***** Computer Select, December 1996 -- Software Product Specification *****

Product: Norton pcANYWHERE32 (V.7.5)

* Data Sources Report COPYRIGHT 1996 Information Access Company

Company: Symantec Corp. (Delrina Group)

Address: 895 Don Mills Rd., 500-2 Park Centre

Toronto, ON, CD M3C 1W3

800-441-7234; 416-441-3676

Direct sales: 800-879-5075

FAX: 416-443-4354

Tech support: 416-441-3086

Category: Software, Communications

PC Communications Utilities

Specs: Mfr. suggested list price: \$149

Release date: 1996

June ?

Application: PC Communications Utilities

Compatible with: Windows 95; Windows NT

Minimum RAM required: 4 MB

Minimum RAM recommended: 8 MB

Disk storage required: 16 MB

Network(s) supported: Novell NetWare; NetBIOS; Banyan; TCP/IP;

IPX/SPX

Product Summary:

32-bit client application for remote users that provides access to desktop computers at home office or to centralized remote access server. Provides remote control connectivity. Transfers actual data from central server to remote computer, enabling remote user to run applications locally and dial in to corporate LAN for access to files and databases. Features automated configuration.

Full Description:

Enables users to access their office computers or networks remotely. Provides users with access to remote applications, files, e-mail or printers. Offers remote control, file transfer and general communications with modem, cable and LAN connections across Windows 95 and Windows NT. Supports multiple operating systems and secure entry to the corporate network and for traveling sales and business managers. Features a redesigned user interface that includes a customizable button bar, new property sheets, Quick Start wizards, long file names and right mouse button support. Provides TAPI/Unimodem support that facilitates setup, Plug and Play support that handles system changes and OLE 2.0 implementation that enables users to take a host directory entry and drag it directly onto the Windows 95 desktop for execution later. Allows users to initiate and manage a combined remote node and remote control solution.

Offers ColorScale which is a user-definable option that allows users to select higher refresh speeds while reducing bitmap color resolution on the fly and SpeedSend which transfers only the parts of the files that have changed. Provides access to such on-line functions as screen scaling, file transfer, chat or host screen blanking and on-line help. Implements Symantec's Norton AntiVirus technology to add security to remote applications and data.

Other Terms:

remote control; client/server; remote access

Record#: 402 362 191 006 006 1

**** Computer Select, November 1997 -- Software Product Specification ****

Product: Citrix ALE (Application Launching and Embedding)
* Data Sources Report COPYRIGHT 1997 Information Access Company

Company: Citrix Systems, Inc.
Address: 6400 Northwest 6th Way
 Ft. Lauderdale, FL 33309
 800-437-7503; 954-267-3000
 FAX: 954-267-9319
 Tech support: 800-424-8749
 Tech support BBS: 954-346-9004

Category: Software, Communications
 Internet/Intranet Software
Specs: Release date: 1996
 Application: Internet/Intranet Administration & Security
 Compatible with: Windows 95; Windows NT

Product Summary:
Distributed application launching and embedding software that enables standard 32-bit Windows applications to be published over corporate Intranet and public Internet. Includes 3 components: ICA client software, WinFrame multi-user application server software, and ICA hot-links. ICA hot-link information includes application and server locations, access security and other data that describes how application should run.

Full Description:
Offers users access to software components entitled ICA client, WinFrame multi-user application server and ICA hot links that enable them to publish their applications via intranets and the Internet. Provides such hot-link related information as application and server locations, access security and site description data and can access hot links to both embed and launch Windows applications in Web pages and launch applications from standard Windows desktops and groupware or e-mail systems. Employs Java and ActiveX and allows users to host fully functional Windows applications on Internet browsers. Performs distributed applications launching and embedding and lets corporate customers deploy their line of business applications using any combination of dial-up, Internet and intranet connectivity.

Other Terms:
application development; Internet security

Record#: 200 267 191 014 001 6

Workstation-based C3I systems
INTERNATIONAL DEFENCE REVIEW. (IDR) JUNE 01, 1992 p. 81 v.25 no. 06
By: by Mark Hewish

The increasing adoption of commercially developed data-processing equipment and standards for C3I applications allows military users to benefit virtually instantly from the high performance and low cost of modern machines. Hughes BTG Company, which won the contract to supply the US Navy's TAC-3 (Tactical Advanced Computer) in March 1992, began deliveries within days of the award. TAC-3 is a ruggedized variant of the Hewlett-Packard Series 700 commercial workstation, using HP's 66MHz PA-RISC microprocessor, that provides 76.7 MIPS of integer performance and 23.7 MFLOPS of floating-point operation. In addition to being more powerful and rugged than its predecessor, the DTC-2, TAC-3 is also cheaper.

TAC-3 is an example of the now-commonplace procedure of adopting COTS (commercial off-the-shelf) equipment as an NDI (non-developmental item) for defense use. Such equipment conforms to industry standards, allowing products from a variety of manufacturers to operate together within an open-system architecture. The US Navy recently introduced MIL-STD-2036, specifically relating to COTS equipment for shipboard applications, are due to follow.

The US Marine Corps has taken advantage of commercial technology in its AN/TSQ-90(V) TERPES (Tactical Electronic Reconnaissance
